

Welcome to DAaaS Geo

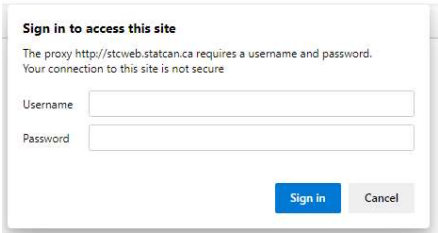

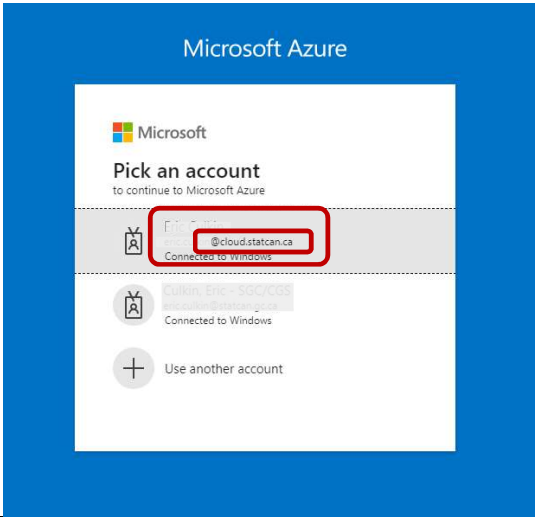

DAaaS Geo is currently working in a development environment; therefore, some features users anticipate are not yet available.

As early adopters, the environment, methods of access, and tools available to you will evolve and improve as the DAaaS platform develops. Your feedback and suggestions are a critical component of the platform's user-centric planning; please feel free to contact any members of the DAaaS Geo team at any time.

How to access your VM

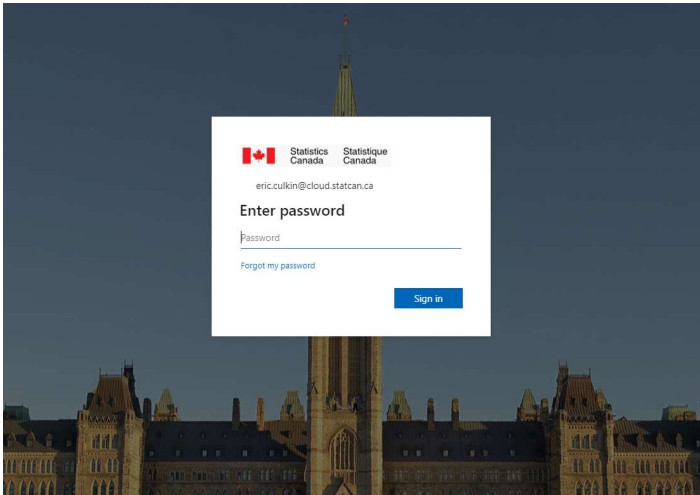

A DAaaS Geo Virtual Machine has been created for your use.

This guide explains how to access the STC Cloud, and then access your DAaaS Geo Virtual Machine.

<p>After connecting to the StatCan VPN... Access the Azure portal using:</p> <p>Depending on when you last used your login(s), you might jump ahead a few steps</p>	<p>https://portal.azure.com</p> <p>*Chromium or Edge; IE not supported</p>
<p>If prompted, enter your proxy credentials</p> <p>...wait</p>	
<p>If prompted, select your <u>CLOUD</u> account.</p> <p>or enter <i>First.Last@cloud.statcan.ca</i></p> <p>...wait</p> <p>If this is your first time accessing the cloud, you will be asked to set up verification and reset the temporary password.</p> <p>Follow the prompts.</p>	
...	...

When prompted, enter your **CLOUD** password.

This may take a few moments.

.... wait

Complete the verification on your phone, via App or Call.

This may take a few moments.

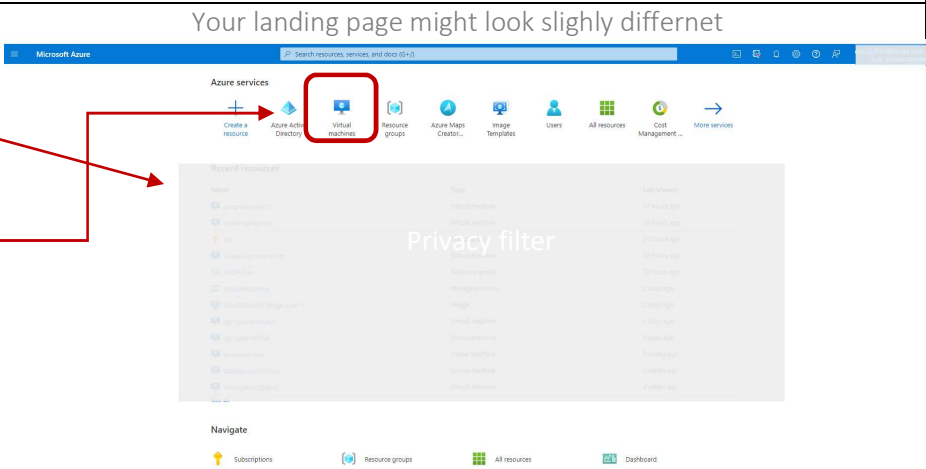

Complete personal verification on cellphone if prompted

You are now in the StatCan Azure Cloud.

Your VM might be listed below:

If not, **Click** the Virtual Machines icon.

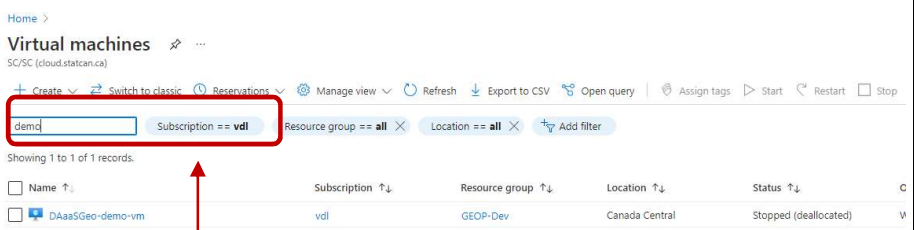

[you'll see other project here, but won't be able to access the VM]

Is your VM listed here?

If not:

1. Ensure the Subscription filter is set to 'vdl', or all
2. Search for your VM by its name

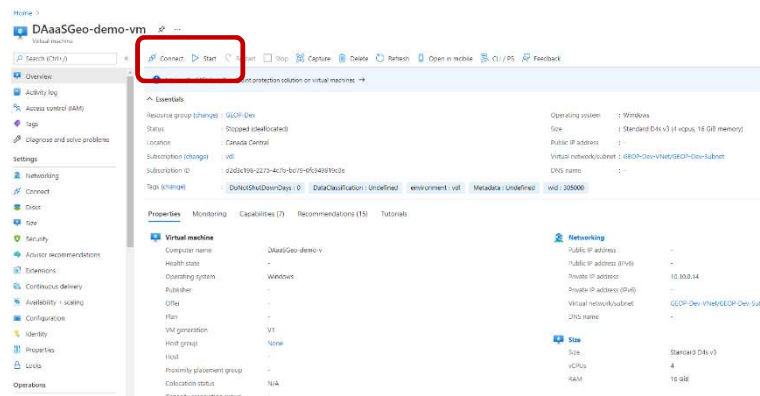

Select your VM

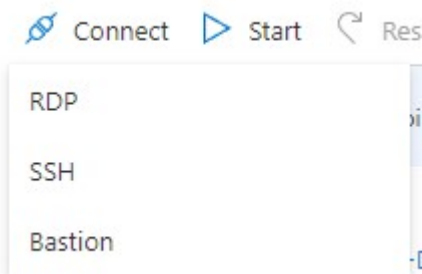

Click on the **Start** button to run your VM.
This will take a few moments.

This may take a few moments. Wait for the success notification.

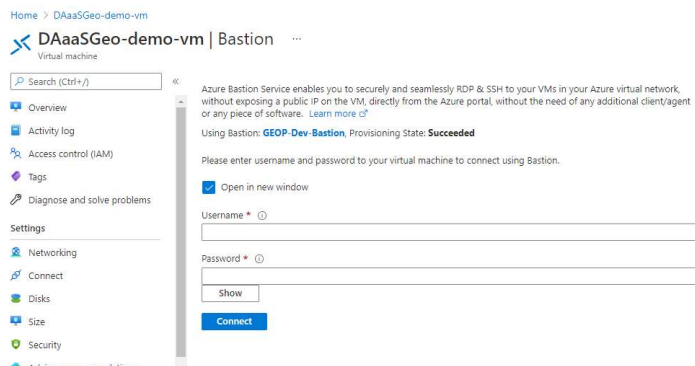

Once the VM has started, **select connect**,
then select **Bastion** from the drop down list.

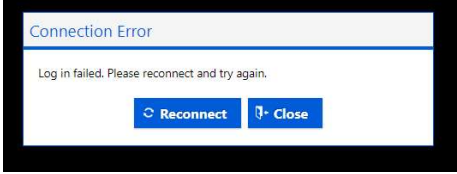

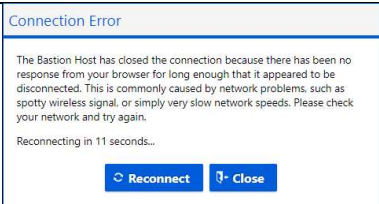

Enter the VM credentials that were
provided to your team.

Click Connect
Disable popup blocker if necessary

Troubleshooting:

<p>Error during VM connection attempt:</p> <p>The username or password is incorrect</p>			
<p>Error during VM connection attempt:</p> <p>The VM was not started, or has not finished starting. Wait a few moments and try again.</p>			

VM Notes:

- VMs have an **auto-shutdown time of 7pm** est. (this can be adjusted upon request)
- ArcPro, QGIS have been pre-installed
- Using keyboard shortcuts while connected to a VM may not result in the same action as expected.
